PROFILE

IT-focused problem solver with hands-on experience building web-based systems, automation tools, and troubleshooting technical issues. Skilled in Python and JavaScript, with a strong ability to learn quickly and solve real-world problems.

WORK EXPERIENCE

CAPACITI Demand Academy 2025 - MARCH 2026

Learnership

- Participating in AI and cybersecurity training program
- Gaining practical exposure to real-world technical concepts
- Developing problem-solving and teamwork skills

Nexa East Hub 2024 - 2025

Freelance IT Support & Web Assistance

- Provided IT support and troubleshooting for users.
- Configured and maintained website systems
- Supported users with technical issues and system use

Secure Sphere 2023 - 2024

Cybersecurity Intern

- Assisted with basic cyber threat monitoring tasks
- Supported vulnerability assessment activities
- Learned incident response processes and network analysis basics

EDUCATION

Digital Regenesys Business School 2023

Cyber Security Fundamentals & Defensive Toolkit

False Bay College 2022

Electrical Engineering N1

Bloekombos Secondary School 2021

National Senior Certificate

PROJECT EXPERIENCE

- Automation & Web System Project (Personal / Client-Based Learning Project).
- Built and tested a web-based system designed to process and track application data.
- Worked with Python and backend logic to automate repetitive processes.
- Handled real-world challenges such as errors, retries, and system stability.
- Deployed and tested the system in a live server environment.
- Improved performance through testing and iteration.
- Worked on a real-world system used for testing and client evaluation.
